

In the zip file, have 2 file: chromedriver and RU2Go.jar.
Requirement: Java environment (Program created with JDK 1.8.0_152)
double click RU2Go.jar
Input the location of chromedriver (ex. /Users/***/Downloads/chromedriver)

Get class (register the class)

input requirement: NETID, RU password, Department (ex. 198), Subject (ex. 213)

Click Get Class button, the program will find a section (time) for you based on the schedule you already have. Finally register.

Note: you cant over max the credit.

Get class (Update Google calendar from Webreg)

input requirement: NETID, RU password, Gmail (email address), Google Password, Start Date, End Date

Click Get Google button, the program will find your schedule on Webreg and Update to Google Calendar in your account.
